Alignment Platform

The publishing industry relies on the ExACT enterprise application to align K-12 educational content to learning standards. Tap into millions of learning standards and attach those standards to your content in order to ensure adoption, increase discoverability, identify new markets, and target learning needs.

Exact Alignment Tool

EdTech companies and publishers use ExACT to:

- Store content metadata in one convenient place.
- Automatically capture standards updates and ensuing alignments.
- Globally align resources to standards for states, districts, provinces, territories, or unique supplemental standards.
- Access and integrate ExACT alignments into your system for an unlimited time.

Exact Reporting

Whether your in-house team is doing the alignment in the ExACT platform or EdGate's team of subject matter experts are aligning your content, you can rely on the robust reporting tool to:

- Generate, visualize, and search alignment data.
- Create on-demand reports for sales or marketing presentations, RFPs or state adoptions.
- Create custom reports.
- Develop reports that address geographic requirements.
- Produce reports in Word, Excel, PDF or HTML.

"The ExACT Alignment Tool allows us to mass align all of our content so that we are always up to date with the latest standards for our customers. This is the number one questions asked by potential and current clients: Is Nearpod aligned to the new standards?"

Alex Bramer, Curriculum Alignment Specialist, Nearpod

ExACT is relied on by organizations like:

 Actively Learn

 Edgenuity

 Florida Virtual School

 myON

 Rethink Mental Illness.

AutoAlign

For high volumes of educational resources, there's ExACT AutoAlign. This tool analyzes metadata and associates resources with appropriate educational concepts and educational standards.

Save your organization time and money

EdGate can align a complete curriculum to all 50 states in a fraction of the time it would take using the traditional state-by-state method that many companies use.

Direct Alignment

Perfect for assessment items, this feature makes it possible to align your resources to precise standards, rather than all applicable standards. Your team will be able to direct align to a specific standard in a standard set or you can choose to direct align to related standards across multiple standard sets.

Gap Analysis

Gap Analysis helps reveal the educational standards that do not align to a specific content unit. This information can then be used for content development, state or district bids, and general analysis of content coverage for a specific standard. You will have the ability to:

- View, print, or export reports on aligned and non-aligned standards
- Refine alignments
- Produce statistical reports that reveal content coverage.

Keyword Creation

Imagine automating the creation of highly valuable metadata. It's possible. ExACT Keyword Creation analyzes textual metadata associated with a resource and returns search terms or keywords that would be useful in locating that resource. The metadata used for the analysis can be the resource title, descriptions, and more. Clients also use this tool to categorize content and provide content suggestions for users.

Related Standards

The Related Standards feature can be used to:

- **Broaden your alignments coverage.** If your current standards alignments are tight and you need to achieve more coverage for an RFP or adoption.
- **Easily align your content to all 50 states.** When you directly align a piece of content to a specific standard using EdGate's Direct Align tool, you can simultaneously direct align the resource to the same "standards" in other states.
- **Expand out from the Common Core.** Similar to the above, when you align your content to the Common Core standards, you can easily find related standards in additional states.
- **Repurpose your content.** Find alignments to similar, but different standards.

Standards

Armed with the world's most comprehensive standards library, you have access to millions of up-to-date U.S., international, and supplemental education standards in a machine-readable format that can be added to your ExACT profile. EdGate also offers the IEdTech CASE identifiers.

What sets EdGate apart? It's our patented alignment methodology

The framework upon which ExACT was developed is EdGate's Concept Index. The Concept Index is a taxonomical list of educational concepts (terms) that was designed and built based on K-12 standards and has been refined and improved year after year. The list of terms which has been aligned to all standards in our repository is what ties everything together and allows for a global alignment to all standards.

Your team simply chooses the concept(s) they want to tag the item to and hits submit. It is at that point that the item is correlated to any/all standards containing the same concept(s).
